How to use this book

GK is a graveyard of rote learning for most aspirants — they try to memorise unconnected facts and forget them under pressure. This book beats that by grouping facts by category (awards, dances, sports, international organisations) and anchoring each cluster to a story or a memorable hook.

The most important thing: Examiners love niche topics. Folk dances of Northeast India, tribal art forms, martial arts of specific states, musical instruments and their categories — these are the questions that separate 70% students from 85% students. Most people skip them because they seem obscure. That is exactly why they appear in exams. This book gives extra depth to all of them.

How to study GK: Work one section at a time. Read a table, close the book, and try to produce it from memory. If you can't name 7 of 8 items, re-read and try again. The spaced repetition cycle (today, then 3 days later, then 7 days later) gives you the best results for this type of material.

The "What's New" section at the top changes every year — re-read it one week before any exam. Everything else in this book (national symbols, classical dances, Bhakti saints, important days, historical firsts) is static and does not change.

EXAM ALERT

****Error-log rule:**** For every question you got wrong, write one sentence explaining what you missed. Retest yourself on only those questions 3 days later — without looking at the solution. This single habit doubles what the mock teaches you.

Note for Q22: Hockey is India's national game (although this is sometimes debated). Examiners consistently list hockey as the official answer.
